

Inventory Manager™

Save Time and Prevent Shortages with Accurate and Automated Inventory Management

- Optimize inventory levels by monitoring what's physically on hand, customer orders, incoming/outgoing inventory transfers and purchase orders.
- Automatically generate accurate replenishment orders based on data and self-defined rules.
- Be informed about excessive inventory and identify instances where inventory was purchased, with no customer dispense orders received.

10—20% in inventory stemming from better forecasting of on-hand quantities and elimination of excess inventory

SureCost Inventory Manager™ oversees physical and perpetual inventory, transfers and returns, enabling standardization of items across all pharmacies and quicker responsiveness to changes in stock levels. Get real-time inventory valuation based on the last acquired price.

Seamless Integration With Your Current Systems

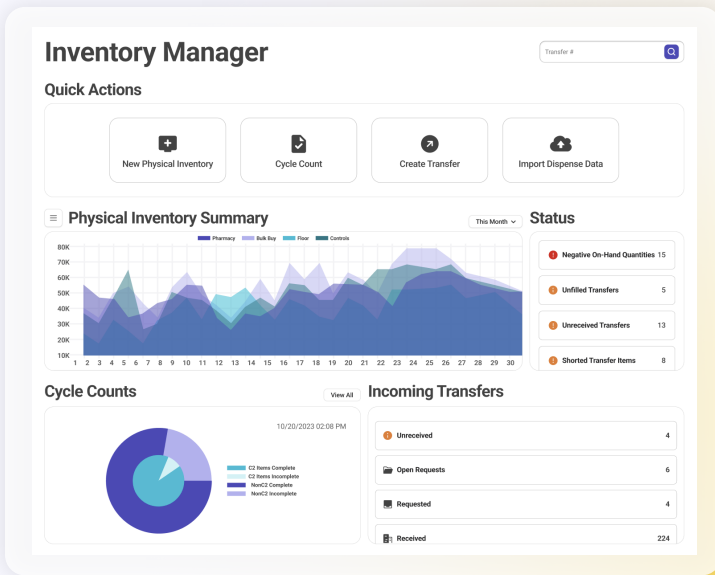

SureCost seamlessly integrates with your pharmacy management system, accounts payable and warehouse. Inventory Manager™ enables you to order a curated list of items aligned with your dispensing trends. With automated invoice reconciliation, there's no need to marry paper invoices and packing slips. This ensures heightened accuracy in both inventory levels and purchase orders.

In addition, a centralized distribution hub captures usage and movement data from warehouse to pharmacy distribution. With SureCost, program the product destination according to the NDC and flag for deviations. Customize data feeds by linking to ERP or data warehouse at required intervals, and transmit via AS2, FTP, CSOS, SFTP and email.

Designed by a Pharmacist for Pharmacies

The SureCost team has **100+ years** of combined pharmacy experience.

Transfers

Identify stale or slow-moving products and initiate transfer of inventory to other departments or pharmacy locations—entirely automatically. Stay informed via transfer-tracking notifications.

Automate Replenishment Orders

Generate daily or just in time data-driven orders by considering purchasing and usage volumes and inventory levels. By having the right inventory at the right time, pharmacies save several hours per week while reducing out-of-stocks.

Pharmacies Save an Average of **50% of Time Spent** on Purchasing and Inventory Management with SureCost

Without SureCost

2–3 hours

With SureCost

1–1.5 hours

SAVE TIME AND MONEY

Learn how PharMerica leveraged Inventory Manager™ to save time and money

“

When I was a pharmacy technician, it took one to four hours on a good day to complete cycle counts. Once we implemented SureCost’s perpetual inventory management, our counts were easily and accurately up to date. **This cut down the time to 30 minutes for my cycle counts** and, in 15 minutes, I would confirm my order is up-to-date and submit it. I spent less time on purchasing and freed up my time to help in other areas in the pharmacy.”

Gabriel Toribio, Central Purchasing Manager at PharMerica

Receive Anytime, Anywhere

Manage inventory from wherever you want, whenever you like with the SureCost mobile app. Add items to open purchase order worksheets out on the floor or even from a remote location. Do quick cycle counts out on the floor without a laptop and cart. Easily request, receive and fill transfers.
